

Exact WMS

Flexible warehouse management on your terms. Control the flow of goods from receipt to delivery with Exact WMS. The features you need, tailored to the way you work.

Key features

01. TAILORED TO YOUR INDUSTRY

Supports a wide range of units and packaging types as standard, so warehouse management fits your goods and workflows.

02. USE WHAT YOU NEED

Use Exact WMS as a complete warehouse management system, or choose the features you need. Expand the solution as your needs grow.

03. CONTROL IN EVERYDAY OPERATIONS

Keep track of goods, stock and tasks in a solution tailored to the way you work. The right information where the work happens.

What does Exact WMS do?

Exact WMS manages all or part of your warehouse, from goods receipt and internal production to dispatch to customers.

Sone4 has particular expertise in the food industry, including sampling and best-before date management.

Moving and picking use handheld scanners, with support for automation such as AGVs and scanning portals.

Availability

CONCURRENT ACTIVITY

Exact WMS follows Sone4's flexible "Concurrent Activity" pricing model.

WORKS WITH YOUR SYSTEM

Use the modules you need alongside the systems you already have.

Standalone modules in Exact WMS

Label Print: Label printing from warehouse workflows to industrial printers.

Portals: Automatic recording and checking of goods using barcode and RFID portals.

Lights HMI: Local status display and control of label printing and scanning portals.
