

NorBins

NorBins makes waste compactors smart. Track location and status, automate emptying and maintenance, and connect owners and service providers in one solution.

Key features

01. MAP-BASED FLEET MANAGEMENT

View container locations and status on one map. NorBins Connector updates location and status automatically.

02. AUTOMATED EMPTYING AND MAINTENANCE

Let a full signal trigger an emptying request, and order maintenance based on usage or time. Jobs go to your chosen service provider.

03. COLLABORATION AND DOCUMENTATION

Bring owners and service providers into one workflow. Share status and document completed jobs for follow-up and billing.

EXACT TRACE®

Exact Trace® is Sone4's platform for secure identity, access control, collaboration and tamper-proof traceability.

Our EventStreams are anchored in the public Hedera network and can be independently verified.

SONE4

The Norwegian technology and consulting company behind Exact Trace® and Exact WMS®.

Benefits for everyone

USER

Avoid wasted trips to a full container or one away for emptying.

Automatic emptying requests help improve availability.

Stay informed in the app.

OWNER OR LESSOR

Track container movements and status on the map.

Secure records show who ordered services and where the container was.

SERVICE PROVIDERS

Early alerts enable faster response and better planning.

Documented service strengthens customer relationships and helps retain customers.

How does NorBins work?

A NorBins Connector is fitted to the container, connected to its full sensor and activated with a licence. NorBins' cloud service orders emptying and any required mechanical servicing according to your needs and settings.

Users and managers receive alerts and status updates in the app for Android and iPhone. They can override automation and order services themselves when needed.

Availability

FREE APP AND USE

With a valid container licence, an unlimited number of users can access it in the app.

USE YOUR SERVICE PROVIDERS

Choose who handles emptying and maintenance at each location. Follow up jobs via the app or email.
